

# Yes Class Learning Program

## Parent's Guide

# Is your child reaching his or her full academic potential?

What would you like to see  
change by the next school  
year?

- More A's?
- Less stress and frustration?
- Better outlook of school?

**LET'S GET STARTED TODAY!**

# Common Academic Concerns

## Grades

Is your child's academic performance not up to expectations?

## Attitude

Does your child show a lack of interest in academics and school?

## Stress

Is your child exhibiting signs of stress and frustration from school?

## Challenge

Does your child feel he or she is not challenged enough at school?

# Yes Class Learning Program

## A Unique Solution

**Y**our  
**E**ducational  
**S**uccess

### What is the Yes Learning Program?

1. A comprehensive, state-aligned, K-12 Math and English Program designed to help struggling students **catch up** as well as top students **race forward!**

2. At the core of our program is the Blended Learning Approach. Our program seamlessly combines long-established methods of education with the latest in computer education technology.

3. The Yes Learning Program is aligned with the new national Common Core curriculum.

# Yes Class Learning Program

## The Yes Class Advantage

### The Yes Class Philosophy

A strong foundation is necessary for long-term academic success. Our students begin at a **comfortable** starting level to build a solid foundation for success.

The program is self-paced, meaning that your child will work at his or her own learning abilities comfortably.

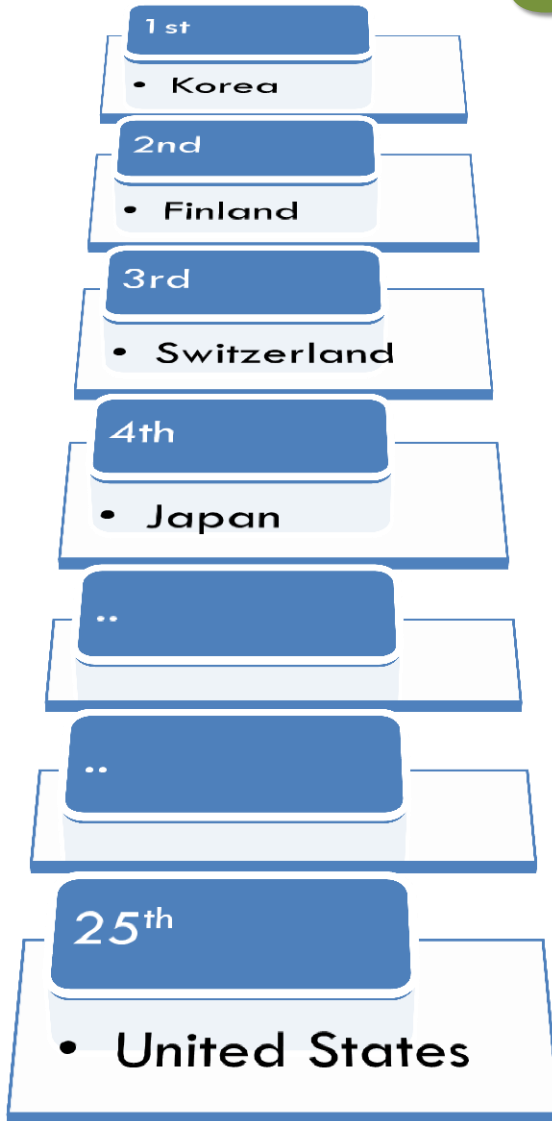

**Ultimately**, this is to inspire self-confidence as well as develop self-learning skills that help accelerate your child's learning abilities.

The YES Class program starts your child off at a more comfortable level to build a stronger foundation. This allows your child to effectively and easily grasp more difficult concepts.

# Yes Class Learning Program

## US Worldwide Ranking

### Did you know...

Despite spending the most amount of money on education per student, the United States is **only ranked 25<sup>th</sup>** in the world-wide ranking for mathematics performance?

Not surprisingly, the consistently top scoring countries have something in common: Many students from those countries are enrolled in supplementary education programs like **Yes Class!**

Yes Class Learning Program

# Blended Learning Approach™

## Blended Learning Approach™

At the core of the Yes Learning Program is the **Blended Learning Approach™**.

1. The program utilizes the interactivity and multimedia capabilities of computers to teach effective and frustration-free lessons.
2. After the computer lesson is completed, the student works with a teacher and on workbooks that presents problems in increasing difficulty and complexity.

**THE RESULT?**

**A HIGHLY EFFECTIVE & STRESS FREE LEARNING PROCESS!**

# Yes Class Learning Program

## What is the Common Core?

### Common Core

Common Core is a new set of higher education standards adopted by nearly all US schools. The new standards emphasize **Math and English** as the basis of US academics.

## YES CLASS IS ALIGNED WITH COMMON CORE!

### Yes Class & Common Core

Our program has been designed from the ground up to align with the new Common Core Math and English standards. This means that the Yes Learning Program is the most comprehensive and up-to-date in comparison to other programs.

# Yes Class Learning Program

## Fostering Effective Learners

### Academic Benefits

#### Academics

- **Better grades**
- Increased academic **self-confidence**
- Increased **concentration**
- Foster better **study habits**

#### Math

- Develop analytical skills
- Develop critical thinking skills
- Learn how to “think” and “see” mathematically

#### English

- Develop better reading habits and skills
- Increase comprehension and analysis skills
- Better spelling and grammar skills

# Yes Learning Program

## Fostering **Life-Long** Learners

**Self-Learning. Self-Confidence. Success.**

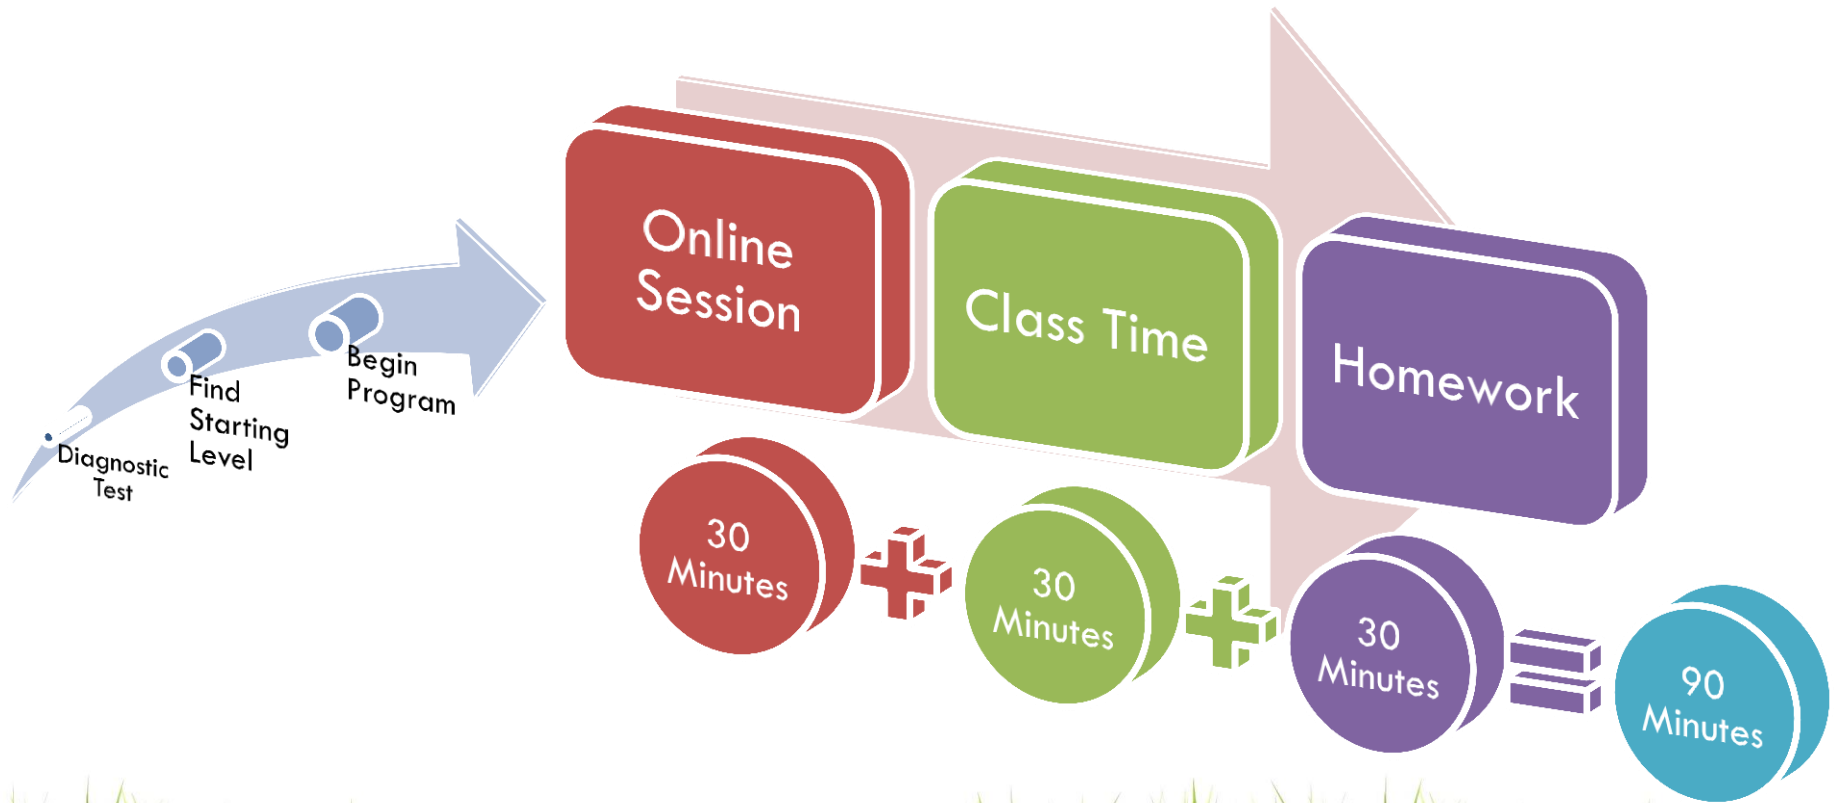

Not only do we seek to improve your child's immediate academic ability, we also hope to foster **good study habits** and a **life-long interest in learning**.

Your child will apply what he or she has learned here, outside the boundaries of academia to become a **smart, productive and successful individual**.

## Analysis. Analysis. Analysis.

The Diagnostic Tests are designed to pinpoint exactly where your child's academic levels stand, regardless of age and grade. The test will also pinpoint **strengths and weaknesses** your child may have in Math and English. This will determine a **comfortable starting point** for your child to begin our program.

## Technology meets education.

During the Online Session of the Yes Learning Program, your child will work with multimedia learning applications which includes:

- Over 1,000 interactive, sound enabled, multimedia books.
- Comprehensive online Math program that provides real time feed back on correct and incorrect problems.

Our Online Session also provides detailed statistics and reports on your child's progress.

"I'm bored," said Sarah, as she walked into the kitchen for breakfast one Saturday morning.

"Would you like to invite a friend over?" asked her mother.

"No," said Sarah, "that's not the problem. I'm bored being ten."

"Well, your birthday is only a few weeks away," said her mother, "so you won't have to be ten much longer."

## Personalized. Effective. Proven.

During Class Time, your child will have an individualized lesson for 30-40 minutes. Your child will receive a weekly Math and/or English workbook. During class, our instructors thoroughly teach all concepts presented in the workbooks and encourage students to explain the steps they took to solve problems.

Name: \_\_\_\_\_ Date: \_\_\_\_\_

Introduction: Matching Pictures, Words, and Fractions

Match the pictures, words, fractions.

Pictures	Words	Fraction
	One third	$\frac{1}{3}$
		$\frac{4}{5}$
	three quarters	$\frac{1}{2}$
	Two fifths	$\frac{3}{4}$
	Four fifths	$\frac{2}{5}$

Name: \_\_\_\_\_ Date: \_\_\_\_\_

✦ Multiply.

(1) $\begin{array}{r} 68 \\ \times 2 \\ \hline \end{array}$	(6) $\begin{array}{r} 89 \\ \times 6 \\ \hline \end{array}$
(2) $\begin{array}{r} 45 \\ \times 8 \\ \hline \end{array}$	(7) $\begin{array}{r} 64 \\ \times 7 \\ \hline \end{array}$
(3) $\begin{array}{r} 76 \\ \times 2 \\ \hline \end{array}$	(8) $\begin{array}{r} 38 \\ \times 5 \\ \hline \end{array}$
(4) $\begin{array}{r} 36 \\ \times 4 \\ \hline \end{array}$	(9) $\begin{array}{r} 36 \\ \times 6 \\ \hline \end{array}$

YES CLASS Dinosaurs

L6-10 Page 1

Dinosaurs first lived on Earth about 200 million years ago. The last dinosaurs lived on the earth about 65 million years ago. No human being has ever seen a dinosaur.

We learn about dinosaurs by studying their bones. Dinosaur bones are called fossils. Dinosaur bone hunters, called paleontologists, dig up dinosaur bones and try to put them back together again. This is how we learn what the dinosaurs looked like. Paleontologists have discovered that hundreds of different kinds of dinosaurs existed.

The dinosaurs lived in three different periods.

The first age of the dinosaurs is the Triassic Period. The very first dinosaurs lived during this time. The middle age is the Jurassic Period. The final age of the dinosaurs is the Cretaceous Period. The last of the dinosaurs lived during this time.

When the dinosaurs lived on Earth, it looked very different than it does today. The climate felt much warmer. In fact, the climate felt similar to that of a hot steamy jungle. Different types of plants grew. Dinosaur fossils have been found in places that have much colder climates today. Since the time when dinosaurs lived, the land and the climate have changed.

Dinosaur fossils are usually found under layers of rock and sand. Some dinosaurs, called herbivores, ate plants. Some dinosaurs, called carnivores, ate meat. Other dinosaurs, called omnivores, ate both plants and animals.

This is the *Herrerasaurus*. The *Herrerasaurus* was one of the first dinosaurs. A very fierce hunter, but not very big, the *Herrerasaurus* was about as tall as your waist. The *Herrerasaurus* lived in the Triassic Period.

# Yes Class Study Flow

**Stay updated. See the process. Watch the progress!**

Every month, our instructors will hold a consultation meeting to keep you updated on your child's progress.

Our instructors go through a background check and a rigorous training program before they are certified to teach at our learning centers.

## Repetition. Review. Success.

Homework assignments end the cycle of the Yes Class Study Flow. The most important part of our program is **practice**.

The workbook starts off with simple and basic problems and very gradually increase in difficulty and complexity.

This way, your child will master all of the skill sets required to solve the harder problems, before attempting them.

**AVERAGE OF 10,000 PROBLEMS SOLVED IN A YEAR!**

# Other Learning Centers VS YES Learning Center

- Aligned to outdated standards
- Focuses solely either on tutoring or worksheets
- Little to no integration of technology

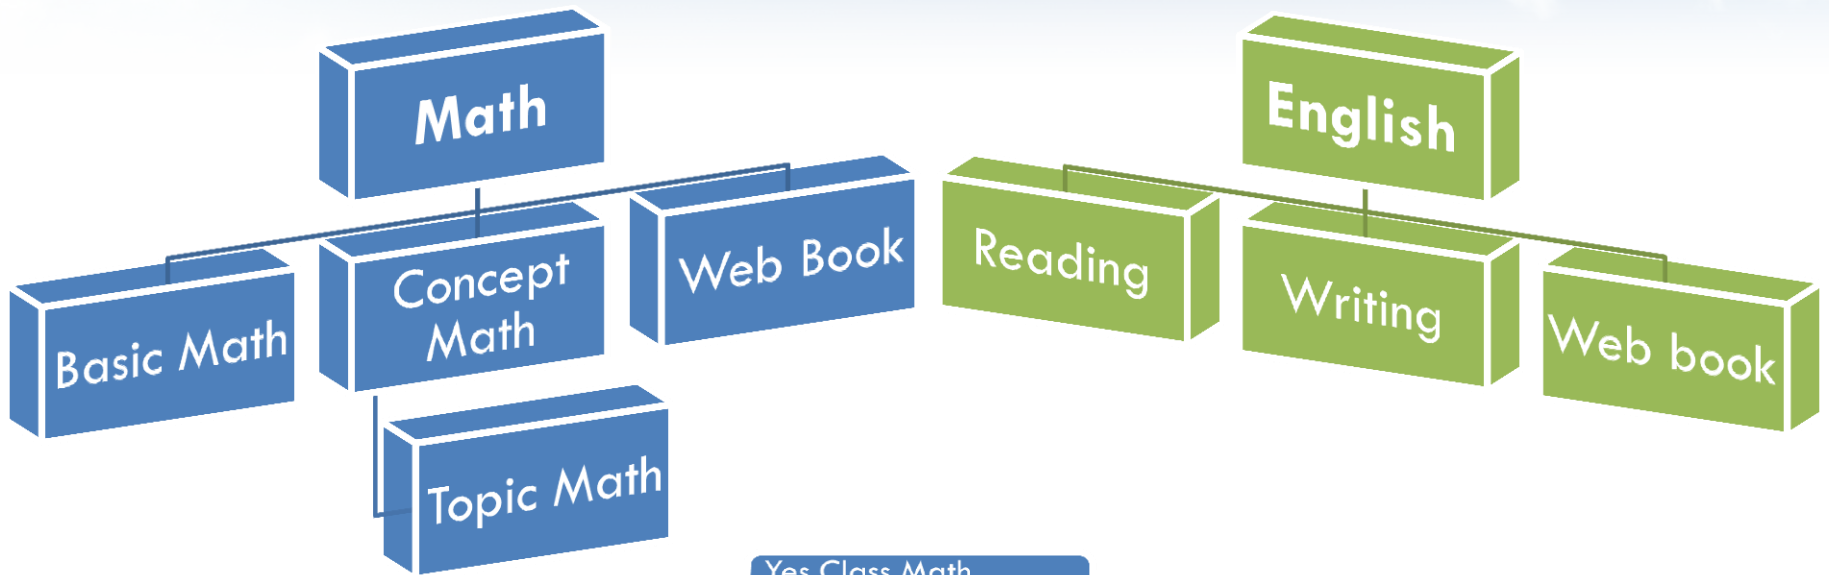

- Aligned with Common Core
- Program uses technology, worksheets and tutoring
- Used by over 90% of students in top scoring countries around the world!

11	121-132												KEY POINT On the basis of the skills developed in L1. (such as work skills, writing tools and the ability to write numbers) there is further progress in learning numbers 1~30. The Child learns the value of numbers 1~30 based on intuition.	On the basis of mental computation skills acquired in L4, the student adds speed and accuracy. Subsequently, being the master in addition and subtraction is achieved.	11																										
12	133-144														%	95% / 0.5-2 min.	95% / 1-2 min.	95% / 1-2 min.	90% / 1-2 min.	80% / 2-3 min.	%																				
13	145-156				Up to number 30 	The child solidifies the sequencing of numbers greater than or equal to 100. The child is introduced to addition of 1's, 2's, and 3's.																The child uses his / her mental capabilities to add, which enables introducing subtraction concepts of 1's, 2's, and 3's.	The child further improves his / her addition and subtraction skills acquired in L3 practice leads to the mastery of addition and subtraction concepts.	On the basis of mental computation skills acquired in L4, the student adds speed and accuracy. Subsequently, being the master in addition and subtraction is achieved.																	
14	157-168						The child solidifies the sequencing of numbers greater than or equal to 100. The child is introduced to addition of 1's, 2's, and 3's.																		The child uses his / her mental capabilities to add, which enables introducing subtraction concepts of 1's, 2's, and 3's.	The child further improves his / her addition and subtraction skills acquired in L3 practice leads to the mastery of addition and subtraction concepts.	On the basis of mental computation skills acquired in L4, the student adds speed and accuracy. Subsequently, being the master in addition and subtraction is achieved.														
15	169-180							The child solidifies the sequencing of numbers greater than or equal to 100. The child is introduced to addition of 1's, 2's, and 3's.																				The child uses his / her mental capabilities to add, which enables introducing subtraction concepts of 1's, 2's, and 3's.	The child further improves his / her addition and subtraction skills acquired in L3 practice leads to the mastery of addition and subtraction concepts.	On the basis of mental computation skills acquired in L4, the student adds speed and accuracy. Subsequently, being the master in addition and subtraction is achieved.											
16	181-192								The child solidifies the sequencing of numbers greater than or equal to 100. The child is introduced to addition of 1's, 2's, and 3's.																						The child uses his / her mental capabilities to add, which enables introducing subtraction concepts of 1's, 2's, and 3's.	The child further improves his / her addition and subtraction skills acquired in L3 practice leads to the mastery of addition and subtraction concepts.	On the basis of mental computation skills acquired in L4, the student adds speed and accuracy. Subsequently, being the master in addition and subtraction is achieved.								
17	193-204									The child solidifies the sequencing of numbers greater than or equal to 100. The child is introduced to addition of 1's, 2's, and 3's.																								The child uses his / her mental capabilities to add, which enables introducing subtraction concepts of 1's, 2's, and 3's.	The child further improves his / her addition and subtraction skills acquired in L3 practice leads to the mastery of addition and subtraction concepts.	On the basis of mental computation skills acquired in L4, the student adds speed and accuracy. Subsequently, being the master in addition and subtraction is achieved.					
18	205-216			The child solidifies the sequencing of numbers greater than or equal to 100. The child is introduced to addition of 1's, 2's, and 3's.																																	The child uses his / her mental capabilities to add, which enables introducing subtraction concepts of 1's, 2's, and 3's.	The child further improves his / her addition and subtraction skills acquired in L3 practice leads to the mastery of addition and subtraction concepts.	On the basis of mental computation skills acquired in L4, the student adds speed and accuracy. Subsequently, being the master in addition and subtraction is achieved.		
19	217-228	The child solidifies the sequencing of numbers greater than or equal to 100. The child is introduced to addition of 1's, 2's, and 3's.	The child uses his / her mental capabilities to add, which enables introducing subtraction concepts of 1's, 2's, and 3's.																																					The child further improves his / her addition and subtraction skills acquired in L3 practice leads to the mastery of addition and subtraction concepts.	On the basis of mental computation skills acquired in L4, the student adds speed and accuracy. Subsequently, being the master in addition and subtraction is achieved.

On the basis of mental computation skills acquired in L4, the student adds speed and accuracy. Subsequently, being the master in addition and subtraction is achieved.						
39	457-468	The child solidifies the sequencing of numbers greater than or equal to 100. The child is introduced to addition of 1's, 2's, and 3's.	The child uses his / her mental capabilities to add, which enables introducing subtraction concepts of 1's, 2's, and 3's.																																	The child further improves his / her addition and subtraction skills acquired in L3 practice leads to the mastery of addition and subtraction concepts.	On the basis of mental computation skills acquired in L4, the student adds speed and accuracy. Subsequently, being the master in addition and subtraction is achieved.

37	433-444	3-digit $\div$ 1-digit numbers					37
38	445-456						38
39	457-468						39
40	469-480						40
KEY POINT		The student learns to memorize the basic skills of multiplication and division. Mental math is reinforced by requiring the student to multiply without carrying over, and dividing without showing tedious work.	Mastery in multiplication and division is achieved. The student understands the correct order of operations, by being able to conceptualize decimals and fractions. The ability to add and subtract decimals and fractions are enhanced.	The student learns how to reduce fractions and to find the common denominator. The student applies the four basic arithmetic operations with fractions. The student utilizes rote memory to convert fractions to decimals and vice versa.	The student is able to calculate fractions by being able to solve combined problems including addition, subtraction, multiplication and division. The student is required to employ the properties of equality to solve equations.	The student improves his / her basic skills regarding negative and positive numbers, on the basis of his / her ability to calculate rational expressions. The student learns to solve linear equations with direct methods.	
%		80% / 3 – 4 min.	70% / 4 – 5 min.	65% / 5 – 6 min.	55% / 6 – 7 min.	60% / 7 – 8 min.

## Level A

A01-Draw a line 1  
A02- Draw a line 2  
A03- Draw a line 3  
A04- Draw a line 4  
A05- Draw a line 5  
A06- Draw a line 6  
A07- Draw a line 7  
A08- Draw a line 8  
A09-Draw a line 9  
A10-Mazes with number 1 to 8  
A11-Mazes with number 1 to 17  
A12- Writing number 0-3  
A13- Writing number 4-7  
A14- Writing number 8-10  
A15- Writing number 0-10  
A16-Writing connect number 1-10  
A17-2Writing connect number 1-10  
A18-3Writing connect number 1-10  
A19-4Writing connect number 1-10  
A20-5Writing connect number 1-10  
A21-Connect numbered star  
A22-Connect number 1-20  
A23-Connect number 1-25  
A24-Connect number 1-30  
A25-Connect number 1-40  
A26-Connect number 1-45  
A27-Coloring matching shapes  
A28-Matching shape  
A29-Matching number 1 to 6  
A30-Matching number 1 to 9  
A31-Matching number 5 to 9  
A32-Matching number 10 to 15  
A33-Count circle simple number 1 to 5  
A34-Count circle simple number 1 to 9  
A35-Count circle simple number 1 to 12  
A36-Count circle simple number 1 to 15  
A37-Count circle simple number 1 to 20  
A38-Count circle simple number 1 to 25  
A39-Count circle number 1 to 5  
A40-Count circle number 5 to 9

## Level B

B01- blank equal sign 1  
B02-blank equal sign 2  
B03-comparing number 1 to 9  
B04-blank equal sign 3  
B05-count circle number 1 to 15  
B06-count circle number 1 to 12  
B07-count circle number 1 to 15  
B08-comparing number all blank  
B09-comparing number mix  
B10-ordering number 1 to 9  
B11-2ordering number 1 to 9  
B12-2-3 missing number 0-5  
B13-1-2 missing number 0-10  
B14-2-3 missing number 0-10  
B15-3-4 missing number 0-10  
B16-1-2 missing number 0-20  
B17-2-3 missing number 0-20  
B18-3-4 missing number 0-20  
B19-Trace and Copy square  
B20-Trace and Copy rectangle  
B21-Trace and Copy triangle  
B22-Counting Number of Sides 1  
B23-Counting Number of Sides 2  
B24-kindergarten geometry mix  
B25-understanding shape words  
B26-Ordering animal 1  
B27-Ordering animal 2  
B28- Color Based On Directions  
B29- Counting Sets of Numbers  
B30- Counting Match Items To Numbers  
B31- Counting number of objects  
B32- How Many Are There  
B33- Counting By Drawing  
B34- Comparing Objects (Which Set Has More)  
B35- Grouping Numbers  
B36- Simple Pattern Skills  
B37-Counting Missing numbers  
B38-Counting Missing Numbers 1  
B39-Counting Missing Numbers 2  
B40-easy mixed addition

## Level C

C01-Learning shapes  
C02-Identifying shape  
C03-Which weighs more or less  
C04-Larger smaller number  
C05-Larger smaller number 2  
C06-Picture addition  
C07-Addition Practice  
C08- Simple Word Problems 1  
C09-Picture Subtraction  
C10-Count and Write 1 to 20  
C11-Counting By Number Ranges  
C12-Larger Numbers And Smaller Numbers  
C13-Counting From Zero  
C14-Counting By 2s, 5s, and 10s  
C15-Picture Based Measurement 1  
C16-Counting By Numbers  
C17-Ordinal Numbers  
C18-Patterns with Shapes and Pictures 1  
C19-Which Shape Doesn't Belong  
C20-Addition Numbers 0 to 9 Vertical and Horizontal  
C21-Following Directions With Shapes  
C22-Subtraction Numbers 0 to 9 Vertical and Horizontal  
C23-Visually Estimate Sums and Differences  
C24-Single Digit Subtraction  
C25-Addition and Subtraction Word Problems  
C26-Write the Missing Math Symbols  
C27-Matching Number Sentences to Pictures  
C28-Adding Single Digits to Double Digits  
C29-Three Number Column Addition  
C30-Learning Basic Shapes and Sides  
C31-Estimating the Half Way Point  
C32-Learning About The Calendar  
C33-Double Digit Addition  
C34-Addition and Subtraction Sign  
C35-Visual Sums Of 3 Numbers  
C36-Adding Double and Triple Digits  
C37-Adding Triple Digits  
C38-Missing Number Addition  
C39-4 Digit to 4 Digit Addition  
C40-4 Digit to 5 Digit Addition & 5 Digit to 5 Digit Addition

## Level D

D01-One from Two Digit Subtraction  
D02-Addition or Subtraction Sign  
D03-Making Sums and Differences  
D04-Subtraction Magic Puzzle Cubes  
D05-Two Digit Subtraction  
D06-Missing Addition or Subtraction Sign  
D07-Subtraction Word Problems  
D08-Missing Digit Subtraction  
D09-Estimate Large Sums and Differences  
D10-Two from Three Digit Subtraction  
D11-Three from Three Digit Subtraction  
D12-4 Digit to 4 Digit Subtraction & 3 Digit to 4 Digit Subtraction  
D13-4 Digit to 5 Digit Subtraction & 5 Digit to 5 Digit Subtraction  
D14-Subtraction Mixed Review  
D15-Three Dimensional Shapes  
D16-Draw Shapes On The Grid  
D17-Identify Two and Three Dimensional Shapes  
D18-Money Word Problems  
D19-Estimate on a Number Line  
D20-Ordering and Position  
D21-Number Patterns  
D22-Picture Based Measurement 2  
D23-Counting Number of Sides  
D24-Estimating Length (Simple)  
D25-Number Pattern Sequence  
D26-Numbers Line Addition  
D27-Visual Subtraction  
D28-Reading Picture Graphs  
D29-Addition Number Grid  
D30-Reading Horizontal Picture Graphs  
D31-Reading Vertical Picture Graphs  
D32-Number Family (Addition)  
D33-Counting Change  
D34-Making Change with Coins  
D35-Greater Than, Less Than, or Equal  
D36-Simple Word Problems 2  
D37-Complete the Symmetry  
D38-Addition Math Trails Puzzles  
D39-Estimating Length  
D40-Estimate Sums and Differences

## Level E

E01-Adding Three Numbers  
E02-Visual Place Value  
E03-Mixed Addition Review  
E04-Large Sums  
E05-Compare and order numbers 1 to 1000  
E06-Estimating Sums and Differences  
E07-Coordinate Identification  
E08-Liquid Measurement (Metric)  
E09-Consecutive Numbers  
E10-Place Value Into Words  
E11-Identify Objects On A Coordinate Grid  
E12-Placing Items on Coordinate Grids  
E13-Plotting Graph Coordinates  
E14-Identifying Grid Location  
E15-What Time Is It?  
E16-Even or Odd Numbers  
E17-Estimate Length and Weight (Metric)  
E18-Estimating Weight and Volume  
E19-Relative Positioning  
E20-Telling Time  
E21-Simple Money Word Problems  
E22-Reading Data Tables  
E23-Estimate the Number of Objects  
E24-Estimate Length  
E25-Using Data Tables  
E26-Using Tally Charts To Make Graphs  
E27-Numbers to Words  
E28-Ordinal Numbers 2  
E29-Multiplication as Repeated Addition  
E30-Ordering Numbers  
E31-Visual Multiplication  
E32-Writing Numbers As Words  
E33-Number Line  
E34-Rounding Numbers To Tens  
E35-Rounding to Tens, Hundreds, Thousands  
E36-Single Digit Multiplication  
E37-Single Digit Multiplication Tables  
E38-Multiplication Times Tables  
E39-Missing Digit Multiplication Easy  
E40-Picture Multiplication

## Level F

F01-Quick Multiplication  
F02-Single-Double Digit Multiplication  
F03-Two Digit with Single and Two Digit Multiplication  
F04-Double Digit Only Multiplication  
F05-Finding the Surface Area and Volume of Cubes  
F06-Three Digit with Single, Double, And Triple Digit Multiplication  
F07-Pictographs  
F08-Reading and Making Histograms  
F09-Visual Fractions  
F10-Color Fraction Objects  
F11-Pictures, Words, and Fractions  
F12-Color Modeling Fractions  
F13-Modeling Fractions  
F14-Converting Units of Capacity  
F15-Converting Units of Length  
F16-Time Word Problems  
F17-Triples Times Double Digit Multiplication  
F18-Triples Times Triple Digit Multiplication  
F19-Missing Digit Multiplication  
F20-4 Digit to 4 Digit Multiplication & 3 Digit to 4 Digit Multiplication  
F21-4 to 5 Digit Multiplication & 5 to 5 Digit Multiplication  
F22-Mixed Digit Multiplication Easy  
F23-Reverse Multiplication Tables  
F24-Patterns Within Shapes and Pictures 2  
F25-Multiplication Math Puzzles  
F26-Multiplication Word Problems  
F27-Mixed Digit Multiplication  
F28-Drawing Ordered Pairs  
F29-Place Value 1s to 10,000s place  
F30-Finding Ordered Pairs  
F31-Division Sharing with Visuals  
F32-Simple Picture Division  
F33-Picture Division  
F34-Divisibility Tables  
F35-Single Digit Division, No Remainders  
F36-Division Determine if Remainders Exist  
F37-Single into Double Digit Division, No Remainders  
F38-Single into Double Digit Division With Remainders  
F39-Triples From Triple Digit Division, No Remainders

F40-Single Digit Long Division with Remainders

## Level G

G01-Identifying Multiples  
G02-Double Digit Long Division  
G03-Missing Digit Division Short  
G04-4 Digit to 4 Digit Division & 3 Digit to 4 Digit Division  
G05-4 Digit to 5 Digit Division & 5 Digit to 5 Digit Division  
G06-Long Division Review  
G07-Estimating Quotients  
G08-Missing Digit Division  
G09-Division Word Problems Easier  
G10-Order of Operations (2-Step Problems)  
G11-Order of Operations (3-Step Problems)  
G12-Order of Operations (4-Step Problems)  
G13-Recognizing Similar and Congruent Figures  
G14-Counting U.S. Money  
G15-Using Math Venn Diagrams  
G16-Graphing Lines By Two Points  
G17-Recognizing Lines of Symmetry  
G18-Find The Area, Perimeter, and Volume of Rectangles  
G19-Visualizing Decimals  
G20-Compare and order numbers 0.0001 to 10  
G21-Place Value 0.0001s to 1s  
G22-Rounding to Thousandths  
G23-Place Value 1 to 100,000 writing in standard form  
G24-Intermediate Word Problems  
G25-Fraction Word Problems  
G26-Unit Conversion- Kilo-, Milli-, Centi-  
G27-Classifying and Measuring Angles  
G28-Factors of Numbers  
G29-Shade and Reduce Fractions  
G30-Common Multiples and Least Common Multiple  
G31-Rewriting Fractions  
G32-Mixed Numbers To Fractions  
G33-Estimating Sums and Differences with Fractions  
G34-Comparing Fractions  
G35-Fraction Addition and Equivalents  
G36-Fraction Subtraction  
G37-Adding Mixed Numbers  
G38-Adding Mixed Numbers 2  
G39-Subtracting Mixed Numbers  
G40-Subtracting Mixed Numbers 2

## Level H

H01-Adding and Subtracting Mixed Numbers  
H02-Convert Mixed Numbers  
H03-Fraction Multiplication  
H04-Fractions As Number Word Problems  
H05-Fractions of Large Numbers  
H06-Multiplying Mixed Numbers  
H07-Fractions of Numbers  
H08-Reciprocal of Fractions and Whole Numbers  
H09-Fraction Division  
H10-Dividing Mixed Numbers  
H11-Dividing Mixed Numbers 2  
H12-Fraction Review  
H13-Find The Area and Perimeter of Triangles, Parallelogram, Trapezoids  
H14-Reading Rulers (Inches)  
H15-Patterns Within Data Sets  
H16-Finding Points  
H17-Plotting Percentages  
H18-Introductory Word Problems  
H19-Decimal Addition (up to 0.001)  
H20-Decimal Subtraction (up to 0.001)  
H21-How Much Change Are You Owed?  
H22-What's Your Change?  
H23-Graphing Coordinates  
H24-Naming Quadrants  
H25-Find the Surface Area and Volume of Rectangular Solids  
H26-Mixed Word Problems  
H27-Estimating Sums and Differences with Decimals  
H28-Writing Coordinates  
H29-Translations, Reflections, Rotations: Transformations  
H30-Triangles  
H31-Decimal Multiplication (up to hundredths 0.01)  
H32-Decimal Division (up to hundredths 0.01)  
H33-Division Math Puzzles  
H34-Mean, Median, Mode  
H35-Division Word Problems  
H36-Data Sets: Mean, Median, Mode  
H37-Order Decimals and Fractions  
H38-Convert Decimals to Fractions and Percentages  
H39-Convert Percentages to Fractions and Decimals

H40-Reading A Ruler (Metric)

## Level I

I01-Compare & Order Decimals, Percent and Fractions  
I02-Reading Circle Graphs  
I03-Basic Word Problems  
I04-Mixed Division Review  
I05-Using Money Conversion Charts  
I06-Scale Factors  
I07-Elementary Probability  
I08-Central Tendency – Mean, Mode, Median  
I09-Representing Integers  
I10-Number Line Expression  
I11-Visual Expressions  
I12-Positive and Negative Number Line Addition  
I13-Using A Number Line To Do Subtraction  
I14-Absolute Value  
I15-Adding and Subtracting Integers  
I16-Multiplying and Dividing Integers  
I17-Divisibility  
I18-Classifying Numbers: Prime or Composite  
I19-Prime Factors  
I20-Divisibility: Add the Missing Number  
I21-Adding Units of Measurement: Mass, Length, and Volume  
I22-Adding Units of Time and Weight  
I23-Adding And Subtracting Measurement With Fractions  
I24-Open Ended Integer Problems  
I25-Line Plots  
I26-Perimeter and Area  
I27-Exploring Figures  
I28-Rewriting Ratios  
I29-Find Angles And Classify  
I30-Adding And Subtracting Measurements  
I31-Adding English Measurement  
I32-Are These Proportional?  
I33-Creating Proportions  
I34-Subtracting English Measurement  
I35-Multiplying English Measurement  
I36-Reading and Making Bar Graphs  
I37-Reading and Making Line Graphs  
I38-Reading and Making Pie Graphs  
I39-Calculator Fun  
I40-Equivalent Proportions  
I01-Missing Proportion  
I02-Draw Lines, Segments, and Rays  
I03-Venn Diagrams  
I04-Scatter Plots and Line of Best Fit  
I05-Identify Polygon  
I06-Finding Common Factors  
I07-Rewrite the expression using Associative Property  
I08-Rewrite the expression using Commutative Property  
I09-Rewrite the expression using Distributive Property  
I10-Commutative, Associative, and Distributive Properties  
I11-Properties of Numbers  
I12-Writing Exponents  
I13-Use Terms  
I14-Combining Like Terms (Simple)  
I15-Simplify the Equations  
I16-Rewrite by Factoring  
I17-Simplifying the Expressions  
I18-Fraction Word Problems (Moderate)  
I19-Addition in Expressions  
I20-Multiplication in Expressions  
I21-Solving Equations Subtraction Principle  
I22-Solving Equations Division Principle  
I23-Basic Algebra  
I24-Consecutive Integers Word Problems  
I25-Solving Equations Practice  
I26-Writing Two Step Equation  
I27-Area of Parallelogram  
I28-Percent of a Number  
I29-Numbers Based on Percentages  
I30-Plotting and Finding Ordered Pairs  
I31-Solving Proportion Problems  
I32-Word Based Proportions Easy  
I33-Measure Length in cm, mm and meters  
I34-Measure Mass word problem  
I35-Ratio And Proportion Word Problems  
I36-Ratio Tables  
I37-Ratio Word Problems  
I38-Classify Triangles  
I39-Box and Whisker Plot  
I40-Read and Make Stem and Leaf Plots

# Yes Class Concept Math Curriculum

## Level K

K01-Area of a Circle  
K02-Volume Word Problems  
K03-Volume and Surface Area of Solids and Cylinders  
K04-Building Quadrilaterals  
K05-Area of Irregular Shapes  
K06-Calculating Interest with U.S. Dollars  
K07-Calculating Interest with U.S. Dollars over 1 full year  
K08-Tree Diagrams & Advanced  
K09-Probability  
K10-Calculate Probability as a Decimal  
K11-Combining Like Terms (Difficult)  
K12-Using Time Conversion Charts  
K13-Function Tables With Missing Parts  
K14-Function Tables  
K15-Variable Expressions  
K16-Integer Word Problems  
K17-Fraction Word Problems w/ Mixed Numbers  
K18-Convert Exponents To Numbers And Compare  
K19-Conditional Statements and Converses  
K20-Identify Similar Triangles With Proofs  
K21-Finding Squares and Square Roots  
K22-Identify And Make Quadrilateral  
K23-Transversals  
K24-Identifying Parallel, Intersecting, and Perpendicular Lines  
K25-Solving Multi-step Equations  
K26-Similar Figures- Finding Unknown Sides  
K27-Squares And Square Roots  
K28-Reading Frequency Tables  
K29-Scientific Notation  
K30-Writing Scientific Notation  
K31-Ratio Word Problems (Moderate)  
K32-Word Based Proportions Difficult  
K33-Transformation  
K34-Multiplying and Dividing Exponents  
K35-Decimal Word Problems  
K36-Surface Area and Volume of Triangular Solids And Cylinders  
K37-Unit Conversion Time And Weight  
K38-Unit Rates  
K39-Circle Diameter Chord Center Or Radius  
K40-Circumference

## Level L

L01-Solving Inequalities By Adding and Subtracting  
L02-Solving Inequalities By Multiplying and Dividing  
L03-Find The Square Root  
L04-Probability Word Problems  
L05-Finding Sides Of Similar Triangles  
L06-Naming Adjacent, Supplementary, and Vertical Angles  
L07-Lines and Planes  
L08-Writing Sentences As Equation  
L09-Evaluating Variable Expressions  
L10-Evaluation of Expressions  
L11-Algebra Word Problems  
L12-Pythagorean Theorem Word Problems  
L13-Calculate Value  
L14-Central Tendency - Mean, Mode, Median  
L15-Common Factors  
L16-Exponents  
L17-Closure Property  
L18-Operations with Signed Numbers  
L19-Add and Subtract Rational Fractions  
L20-Binary Operations  
L21-Factorials  
L22-Categorizing Data and Bias  
L23-Organizing and Interpreting Data  
L24-Perimeter and Circumference  
L25-Metric/English Measurement Conversions and Rates  
L26-Changing Standard Form to Scientific Notation & Changing Scientific Notation to Standard Form  
L27-Approximations of Irrational Numbers  
L28-Binary Operations Advanced  
L29-Solve for an Unknown  
L30-Express as a Single Logarithm  
L31-Determine the value of a log  
L32-Express exponential forms in logarithmic form  
L33-Express logarithmic form in exponential form  
L34-Draw the Line  
L35-Error in Measurement  
L36-Evaluate Expressions with Fractional Exponents  
L37-Slope of a Line  
L38-Slopes and Equations of Lines  
L39-Multiplication and Division of Algebraic Fractions  
L40-Evaluating Expressions

## Level M

M01-Signed Numbers Word Problems  
M02-Exponential Growth and Decay  
M03-Factorial Notation  
M04-Stand Form of Complex Numbers  
M05-Multiplication/Division with Scientific Notation  
M06-Review Practice with Factoring  
M07-Powers  
M08-Rational and Irrational Numbers  
M09-Addition and Subtraction of Algebraic Fractions  
M10-Addition and Subtraction of Polynomials  
M11-Power Word Problems  
M12-Solving Factorable Quadratic Equations  
M13-Simplifying Radicals  
M14-Simplifying (or Reducing) Algebraic Fractions  
M15-Properties of Real Numbers  
M16-Simplify Square Roots with Negative Numbers  
M17-Percentiles and Quartiles  
M18-Properties of Real Numbers (Advanced)  
M19-Linear Systems: Write as a Linear Equation  
M20-Imaginary Unit  
M21-Permutations  
M22-Combinations  
M23-Calculate Probability As A Fraction  
M24-Calculate Probability As A Percentage  
M25-Interest Word Problems  
M26-Division of Polynomials by Monomials  
M27-Add and Subtract Complex Numbers  
M28-Determinants: 2 x 2 Matrix  
M29-Find the Intercepts  
M30-Determinants: 3 x 3 Matrix (Diagonals Method)  
M31-Determinants: 3 x 3 Matrix (Row and Column Method)  
M32-Addition of Matrices  
M33-Solve the Matrix Equation  
M34-Algebraic Translations  
M35-Linear Systems: Write as a Matrix  
M36-Determine Value of Compound (Composite) Functions  
M37-Definition of a Function  
M38-Systems of Linear Inequalities  
M39-Divide Rational Fractions  
M40-Solving Exponential Equations (common base)

## Level N

N01-Direct Variation  
N02-Set Builder and Interval Notation  
N03-Factoring Application  
N04-Solving Fractional Equations  
N05-Multiplication of Matrices  
N06-Solving Linear Inequalities  
N07-Linear Quadratic Systems  
N08-Subtraction of Matrices  
N09-Permutations 2  
N10-Multiply a Matrix by One Number  
N11-Graphing Linear Inequalities  
N12-Simplify Complex Fractions  
N13-Factoring the Difference of Two Perfect Squares  
N14-Cyclic Nature of the Powers of i  
N15-Operations with Radicals  
N16-Undefined Algebraic Fractions  
N17-Undefined Algebraic Fractions (Advanced)  
N18-Multiplication of Rational Fractions  
N19-Theoretical versus Empirical Probability  
N20-Laws of Rational Exponents  
N21-Algebraic Solutions to Linear Systems  
N22-Algebraic Solutions to Simultaneous Equations  
N23-Applications Problems for Inequalities  
N24-Factoring Trinomials ( $a < -1$ )  
N25-Factoring Trinomials ( $a > -1$ )  
N26-Logarithm Word Problems  
N27-Multiplying Polynomials  
N28-Polynomial Word Problems  
N29-Graphing Functions  
N30-Graphing Inequalities  
N31-Tree Diagrams  
N32-Graphing Linear Systems  
N33-Graphing Systems of Inequalities  
N34-Graphing Parabolas  
N35-Graphs and Equations of Lines  
N36-Graphs of Parabolas  
N37-Graphs of Linear Equations: Slope and Intercept  
N38-Prisms, Pyramids, Cylinders, Cones, Spheres  
N39-Single & Compound Events  
N40-Transformations: Identifying Line Reflections

## Level O

O01-Transformations: Identifying Translations  
O02-Tree Diagrams Word-based  
O03-Transformations: Rotation  
O04-Transformations: Working with Translations  
O05-Area on a Coordinate Grid  
O06-Areas of Polygons and Circles  
O07-Intuitive Work with Line Reflections  
O08-Rotational Symmetry  
O09-Congruence of Triangles: Numerical Practice with Congruence  
O10-Congruent Triangles  
O11-Mutually Exclusive & Independent Events, Complement  
O12-Exterior Angles  
O13-Permutations:  $nPr$  and  $nPr$   
O14-Geometric Constructions- Congruence  
O15-Interior and Exterior Angles  
O16-Line Symmetry  
O17-Sample Spaces  
O18-Sample Spaces Word-based  
O19-Midpoint of a Segment  
O20-Conditional Probability  
O21-Parallel and Perpendicular Lines  
O22-Perimeter of Polygons & Circumference of Circles  
O23-Point Symmetry  
O24-Quadrilaterals- The Quadrilateral Family (and Properties)  
O25-Similarity  
O26-Sum of Interior Angles  
O27-Translations  
O28-Polygons- Exterior Angles of Polygons  
O29-Polygons- Each Interior Angle  
O30-Locus at a Fixed Distance  
O31-Locus At a Fixed Distance from a Point  
O32-Locus Equidistant from Two Intersecting Lines  
O33-Equation of a Line  
O34-Locus Equidistant from Two Parallel Lines  
O35-Locus Equidistant from Two Points  
O36-Volume and Surface Area of Solids  
O37-Numerical Practice with BIG Circles  
O38-Circles: Area of Sectors and Segments  
O39-Dilations  
O40-Direct Euclidean Proofs

## Level P

P01-Indirect Euclidean Proofs  
P02-Using a Calculator (sin, cos, tan)  
P03-Transformations- Dilation  
P04-Angles  
P05-Triangles  
P06-Parallel Lines  
P07-Nature of Roots  
P08-Recognizing Congruent Triangles  
P09-Interior Angles of Polygons  
P10-Sum Of Interior Angles Word Problems  
P11-Transformations- Line Symmetry  
P12-Transformations- Point Symmetry  
P13-Triangles In Problems  
P14-Indirect Euclidean Proofs (Graphical)  
P15-Empirical Probability  
P16-Mid-Segment of a Triangle  
P17-Types of Angles  
P18-Rotations  
P19-Isosceles Theorem  
P20-Pythagorean Denominators  
P21-Pythagorean Theorem  
P22-Logarithmic to Exponential Form  
P23-Single Compound Events  
P24-Proof Warm Ups  
P25-Solve For The Unknown  
P26-Reflection in a Point  
P27-Midpoint of a Line Segment  
P28-Probability Problems AND/OR  
P29-Rationalize Denominators  
P30-Mutually Exclusive Events  
P31-Glide Reflections  
P32-Intuitive Notion of Dilation  
P33-Exterior Angles of Polygons  
P34-Tangent of Points  
P35-Area of Polygons and Circles  
P36-Inverse Functions- Calculator Practice  
P37-Parts of a Parabola  
P38-Areas and Coordinate Geometry  
P39-Identifying Translations

P40-Literal Equations

## Level Q

Q01-Compound Locus  
Q02-Circle Proofs  
Q03-Central and Inscribed Angles in Circles  
Q04-Dilations and Similarity  
Q05-Distance Formula  
Q06-Exponential to Logarithmic Form  
Q07-Parabola Standard Equations  
Q08-Classifying a Conic Section  
Q09-Circle Equations  
Q10-Concurrence  
Q11-Congruence of Triangles  
Q12-Congruent Triangle Proofs  
Q13-Parabola Equations  
Q14-Parabola- Equations & Graphs  
Q15-Parabolas- Focus & Directrix  
Q16-Arcs in Circles  
Q17-Area of Sectors and Segments  
Q18-Chords and Circles  
Q19-Hyperbolas in Standard Form  
Q20-Circle Equations and Graphs  
Q21-Circle Equations Based On Radius  
Q22-Chords, Secants, and Tangents in Circles  
Q23-Hyperbolas- Foci and Vertices  
Q24-The Quadrilateral Family  
Q25-Probability: Independent Events  
Q26-Probability Problems Involving AND & OR  
Q27-Functions - Recognize and Evaluate  
Q28-Graphing Linear Quadratic Systems  
Q29-Parabolas- Graphs & Equations  
Q30-Quartiles & Percentiles  
Q31-Tangent of x  
Q32-Coordinate Geometry Proofs  
Q33-Proofs in Coordinates  
Q34-Tangents And Circles  
Q35-Angles Circles- Chords  
Q36-Angles Outside the Circle  
Q37-Angles with Parallel Lines  
Q38-Combinations:  $nCr$  and  $nCr$   
Q39-Complement of an Event  
Q40-Counting Principle

## Level R

R01-Counting Principle (Difficult)  
R02-Algebraic Representations  
R03-Analyzing in Three Dimensions  
R04-Angle Word Problems  
R05-Proportion in a Right Triangles  
R06-Translations & Vectors  
R07-Sine of x  
R08-Triangle Proofs  
R09-Cosine of Points  
R10-Ellipses & Standard Equations  
R11-Ellipses in Standard Form  
R12-Ellipses- Foci & Vertices  
R13-Solving Functions Algebraically  
R14-Sine of Points  
R15-Quadrilateral Proofs  
R16-Reflection in a Line  
R17-Solving Functions Graphically  
R18-Theoretical Probability  
R19-Pythagorean Theorem Word Problems  
R20-Triangle Inequality Theorem  
R21-Value of a Log  
R22-Triangle Inequalities  
R23-Proofs With Congruent Triangles  
R24-Write Parabola Equations  
R25-Absolute Value  
R26-Adding and Subtracting Complex Numbers  
R27-Composition of Functions  
R28-Factoring Polynomials  
R29-Proportions  
R30-Radicals  
R31-Comparison of Volumes of Similar Solids  
R32-Central Tendency and Dispersion  
R33-Fill in the missing angle  
R34-Arc Length and Radian Measure  
R35-Completing the Square  
R36-Trigonometric Functions  
R37-Absolute Value of Complex Numbers  
R38-Trigonometric Ratios  
R39-Solving Quadratic Equations

R40-Solving Quadratic Equations with Complex Roots

## Level S

S01-Multiplying and Dividing Complex Numbers  
S02-Multiplying Rational (Fractional) Expressions  
S03-Angle Sum and Difference, Double Angle and Half Angle Formulas  
S04-Powers of i  
S05-Scale Drawing  
S06-Sequences  
S07-Permutations and Combinations  
S08-Length of a Line Segment - Distance  
S09-Linear - Quadratic Systems  
S10-Area of Triangle Using Trigonometry  
S11-Arithmetic and Geometric Sequences and Series  
S12-Binomial Probability  
S13-Adding and Subtracting Rational (Fractional) Expressions  
S14-Trigonometric Equations  
S15-Theoretical and Empirical Probabilities  
S16-Evaluating Rational (Fractional) Exponents  
S17-Trigonometric Word Problems  
S18-Working with Right Triangles  
S19-Graphs Dealing with Sine and Cosine  
S20-Graphs Dealing with Tangent, Cotangent, Secant, Cosecant  
S21-Nature of Roots - Sum and Product  
S22-Normal Distribution and Standard Deviation  
S23-Exponential Functions  
S24-Absolute Value Inequalities  
S25-Logarithmic Functions  
S26-Cosine: Find the value of x  
S27-Direct and Inverse Variation  
S28-Absolute Value Equations  
S29-Functions - Domain and One-to-one, Onto  
S30-Problems Involving AND & OR  
S31-Graphing Complex Numbers  
S32-Division of Rational (Fractional) Expressions  
S33-CoFunctions  
S34-Logarithmic Equations  
S35-Logarithmic Expressions  
S36-Inverse Functions  
S37-Reference Angles and Triangles  
S38-Rational Equations  
S39-Exponential Expressions and Equations  
S40-The Discriminant

## Level T

T01-Law of Cosines  
T02-Recursive Sequences  
T03-Rational (Fractional) Exponents  
T04-Special Right Triangles (Geometry emphasis)  
T05-Graphically Represent the Inverse of a Function  
T06-Special Right Triangles (Trigonometry emphasis)  
T07-Law of Sines  
T08-Simplifying Rational (Fractional) Expressions  
T09-Simplifying Complex Fractions/Expressions  
T10-Graphs of Polynomial Equations of Higher Degree  
T11-Imaginary Unit and Standard Complex Form  
T12-Rational Inequalities  
T13-Inverse Trigonometry Functions  
T14-Equations of Circles  
T15-Pythagorean Identities  
T16-Quadratic Inequalities  
T17-Positive, Negative and Zero Exponents  
T18-Law of Sines and the Ambiguous Case  
T19-Radical Equations  
T20-Simplifying Square Roots with Negative Numbers  
T21-Sigma Notation and Series  
T22-Rationalizing Denominators with Radicals  
T23-Regression Analysis  
T24-Similar Polygons: Ratio of Perimeters & Areas  
T25-Solving Combinations of Variations  
T26-The Binomial Theorem  
T27-Transformations with Functions  
T28-Polynomial Equations of Higher Degree  
T29-Graphs of Circles  
T30-Solving Exponential Equations (lacking a common base)

# Yes Class Reading Curriculum

Overview	L1	L2	L3	L4	L5 & L6
	Students study sight word flash cards with corresponding pictures. This will help develop phonic awareness, tracking, order of two and three isolated phonemes, etc...	Students learn to identify sight words and unscramble letters. Students are also taught the basics of vowels, consonants and word building.	Students are taught the more technical aspects of word formation. Vowels are explained in more detail and students expand their knowledge of general vocabulary.	Students are introduced to short stories. Level 4 begins with short stories that work to incrementally develop student's reading comprehension ability.	The reading stories in Level 5 and 6 contain more challenging vocabulary words and demand greater reading comprehension ability and critical thinking skills to answer questions.
1	Flash cards contains basic sight words, and gradually increase in complexity as the student progresses through the booklets. There are empty spaces within the flash cards for the student to practice writing the words.	Sight word identification practices.  Circle this sight word: saw  sun saw the I sun saw sun not saw sun I out new sun a saw sun saw sun	Beginning and middle portions of common words are taught  Say the names of the pictures in each row. Circle pictures with the same ending sounds.  wet net jet foot	Level 4 begins with short stories that seek to develop student's concept of sentence structures and comprehension.  This is a square. It looks like a box. Can you draw a square?  This is a triangle. It looks like a hat. Can you draw a triangle?  This is a circle. It looks like a ball. Can you draw a circle?	The readings become longer and more challenging.  McCollum  I keep a collection under my bed. My special collection is made the chocolate. I have a smooth rock that I found along the river. When I hold the rock I remember the moving sound of the water in the river. I have a pinwheel I found under a tree in the park. When I hold the pinwheel I remember the tall tree that it fell from. I have a shiny shell I found on the seashore. When I hold the shell I remember the salty smell of the beach. I have a long, white feather I found at the lake. When I hold the feather I remember the birds I fed at the lake. I keep all these things inside the chocolate. I like to remember these special days. I like my special collection.  "I can't do it," she called to her brother. "Can you please help me?" Allison's brother climbed up the tree and then climbed down with her. He told her where to put her hands and where to put her feet. Soon they looked back at the bottom. Allison sat in the grass with her elbows on her knees and her chin in her hands. "I wish I could get down by myself," she mumbled. "Maybe you can," her brother said. "I have an idea. Can you climb down the big rope on the school playground?" "I can't," said Allison. "What's your idea?" "Wait and see," said Andrew. Allison's brother helped Andrew tie a big strong rope high up in the branches of the tree. The rope hung down to the very bottom. It had a knot at the end of it. Now Allison could climb all the way up the tree, and climb down on her rope. Andrew had a wonderful idea. Not only did the rope help Allison climb down from the top of the tree, but the rope made a great swing for Allison too.

5					
6					
7	 buy	Students associate different pictures from a list of words.  make the bed listen to music play cards play badminton play the guitar play ping-pong	Students learn how to pronounce short words incrementally.  Short Vowels The tree has different parts. Using the tree below, listen the sounds to read a word with the short vowel at the bottom. Trace the word at the bottom.  /b/ b /be/ be /bed/ bed trend	Students answer basic reading comprehension questions.  Write yes or no in the space. Is this a square? 1. _____ this is a square.  Is this a square? 2. _____ this is not a square.	Students learn additional concepts such as nouns, verbs, etc.  Verbs are action words. Choose the correct verb to complete the sentence, then write the verb in the space provided. 1. jump climb eat Allison's brother could _____ the tree.  2. read watched sang Allison _____ her brother climb the tree.

10					
11					
12					
13	 catch	Given a picture, students learn to unscramble alphabets to form a word.  okco	Ending consonants of common words are also explored.  Ending Consonants b, m Write the ending letter of each word. Say the word.  ham tu	As the student's reading skills and comprehension abilities develop, the stories become progressively more challenging to read. The questions require more reasoning and thinking.	Questions ask for more specific details and require more advanced comprehension ability to answer.  Answer these questions on the lines provided. 1. What is the problem in the story? _____ _____ _____ 2. How does Allison's brother help her solve the problem? _____ _____ _____ 3. Can you think of another way to solve the problem in the story? _____ _____ _____

Overview	L7 & L8	L9	L10 & 11	L12
	<p>Students read grade level fiction, non function and informational texts or excerpts. Students explore reading comprehension by answering multiple choice questions, short answer questions and other exercises designed to aid in developing analytical and comprehension skills.</p>	<p>The reading comprehension stories in Level 9 now span multiple pages and become more challenging to read and comprehend.</p>	<p>Level 10 &amp; 11 explores the more technical aspects of reading comprehension such as setting, identifying literary devices, etc. Students must also be able to think critically and are expected to answer more challenging open ended questions in a well organized and persuasive manner.</p>	<p>Students widen their understanding of more advanced concepts of literature, such as plot, setting, irony, etc.</p>
1	<p>Informational texts make up a fair portion of Levels 7 and 8. These texts encompass topics such as historical events, figures, etc.</p>	<p>Stories introduce more abstract concepts that require a higher degree of literary mastery to comprehend and analyze.</p>	<p>The reading comprehension questions require students to understand the names and uses of various literary devices used by the author.</p>	<p>Open ended questions require the student to perform a thorough analysis of the literary text and require a solid knowledge of advanced literary concepts.</p>
2	<p>King Tut was a smart kid. He studied hieroglyphics. Hieroglyphics are little drawings that the Egyptians used for writing their language. Hieroglyphics were simple pictures that showed what the writer wanted to say. For example, a picture of a mouse meant "to speak."</p>	<p>Stories introduce more abstract concepts that require a higher degree of literary mastery to comprehend and analyze.</p>	<p>The reading comprehension questions require students to understand the names and uses of various literary devices used by the author.</p>	<p>Open ended questions require the student to perform a thorough analysis of the literary text and require a solid knowledge of advanced literary concepts.</p>
3	<p>Not all Egyptians could read and write hieroglyphics. Only the children of wealthy Egyptians could go to school and study hieroglyphics. Other children had to go to work with their parents every day to help them out. The students who studied hieroglyphics were called scribes. Scribes had to learn hundreds of different hieroglyphic signs before they could write. Our alphabet is much easier. We only have to learn 26 different letters!</p>	<p>Stories introduce more abstract concepts that require a higher degree of literary mastery to comprehend and analyze.</p>	<p>The reading comprehension questions require students to understand the names and uses of various literary devices used by the author.</p>	<p>Open ended questions require the student to perform a thorough analysis of the literary text and require a solid knowledge of advanced literary concepts.</p>
4	<p>King Tut lived near the Great Pyramids and the Sphinx. Pyramids were very important to the Egyptians. They were used as burial places. When an Egyptian king died, his body was often put inside a pyramid.</p>	<p>Stories introduce more abstract concepts that require a higher degree of literary mastery to comprehend and analyze.</p>	<p>The reading comprehension questions require students to understand the names and uses of various literary devices used by the author.</p>	<p>Open ended questions require the student to perform a thorough analysis of the literary text and require a solid knowledge of advanced literary concepts.</p>
5	<p>The first Egyptian pyramid was made by a king named Cheops. Cheops built the most famous pyramid ever. Cheops's pyramid took many years to build. It is very tall and is made of millions of stones! Many people worked on this pyramid. Cheops's pyramid is one of the three great Pyramids of Giza. Together, they form one of the Seven Wonders of the World.</p>	<p>Stories introduce more abstract concepts that require a higher degree of literary mastery to comprehend and analyze.</p>	<p>The reading comprehension questions require students to understand the names and uses of various literary devices used by the author.</p>	<p>Open ended questions require the student to perform a thorough analysis of the literary text and require a solid knowledge of advanced literary concepts.</p>
6	<p>Have you ever seen a picture of the Sphinx? The Sphinx is a strange beast, with the body of a lion and the head of a king or god. King Tut liked the Sphinx. Often, he would ride his camel to the Sphinx and look at it for hours.</p>	<p>Stories introduce more abstract concepts that require a higher degree of literary mastery to comprehend and analyze.</p>	<p>The reading comprehension questions require students to understand the names and uses of various literary devices used by the author.</p>	<p>Open ended questions require the student to perform a thorough analysis of the literary text and require a solid knowledge of advanced literary concepts.</p>
7	<p>King Tut was a pharaoh. Pharaohs were powerful kings who ruled Egypt. Pharaohs actually means "the one who lives in the palace." Pharaohs were wise. Pharaohs were the great lawmakers, leaders, and the best chariot racers. As a young adult, King Tut became an excellent hunter. He liked to hunt lions, crocodiles, and hippopotamuses.</p>	<p>Stories introduce more abstract concepts that require a higher degree of literary mastery to comprehend and analyze.</p>	<p>The reading comprehension questions require students to understand the names and uses of various literary devices used by the author.</p>	<p>Open ended questions require the student to perform a thorough analysis of the literary text and require a solid knowledge of advanced literary concepts.</p>
8	<p>King Tut loved pets, especially dogs. King Tut had many dogs called pharaoh dogs. They were very pretty with a brown coat, white ears, and a long tail. They were fast and they helped King Tut when he went hunting.</p>	<p>Stories introduce more abstract concepts that require a higher degree of literary mastery to comprehend and analyze.</p>	<p>The reading comprehension questions require students to understand the names and uses of various literary devices used by the author.</p>	<p>Open ended questions require the student to perform a thorough analysis of the literary text and require a solid knowledge of advanced literary concepts.</p>
9	<p>King Tut also liked to play games. He would fish, swim, and play ball games. The people of ancient Egypt had great respect for their pharaohs and treated them like gods.</p>	<p>Stories introduce more abstract concepts that require a higher degree of literary mastery to comprehend and analyze.</p>	<p>The reading comprehension questions require students to understand the names and uses of various literary devices used by the author.</p>	<p>Open ended questions require the student to perform a thorough analysis of the literary text and require a solid knowledge of advanced literary concepts.</p>
10	<p>A variety of questions are used to foster development of the student's reading abilities, comprehension abilities and analytical abilities as well as improve the student's general mastery of the English Language.</p>	<p>The following comprehension questions require the students to perform a thorough analysis of the text as well as have a complete understanding of the story.</p>	<p>Greater emphasis is placed on having the student answer short response questions in a well organized and persuasive manner.</p>	<p>Open ended questions require the student to perform a thorough analysis of the literary text and require a solid knowledge of advanced literary concepts.</p>
11	<p>1. # Yes Class Reading Curriculum

Overview	L13 & L14	L15 & L16	L17 & L18 & L19
	The reading stories span multiple booklets coming in two to three separate parts. Students are expected to understand and generalize the entire story as various comprehension questions based off of the literary work is asked.	Levels 15 and 16 ask the students to "read between the lines" to gain comprehension behind the deeper meaning of the presented text. Students are asked to identify symbolic motifs, meanings, and etc.	The final three levels in the Yes Class Writing Curriculum combines all that the student has learned. The text is difficult to read with many abstract concepts, challenging new vocabulary and requires a good mastery of the English language to comprehend.
1	<p>The reading comprehension stories span multiple books and involves the use of many literary devices that the student must decipher to understand.</p> <p>"When Fritz landed his kayak on the beach, the survivor was not sure whether it was safe to come out of the bushes or not. Fritz waited a long while, and the survivor saw that he had no spears or other weapons."</p> <p>"After a while, Fritz noticed a figure slowly creeping onto the beach, ready to run away if he turned out to be dangerous. It was a girl! When she realized it was safe to come to Fritz, they are both overjoyed. He told her all about his family and the wonderful house they had made. She longed to join them, but she felt very shy, as she had not seen people for so long. She was worried about being the only girl among four boys, so the two of them made a plan. Fritz would go back and get some of his clothes for her, and they would disguise her as a boy. Once she was used to being with them all, then she could tell them she was a girl."</p>  <p>"The family thought they had a new son to live among them. He had to work just as hard as everyone else and was expected to join in the rough games the boys played. Their mother wished Fritz had found a girl as well as a boy, for she missed having a female friend, but she liked their new friend very much. How surprised everyone was when one day their friend told them she was really a girl named Penny, and she wanted Mrs. Robinson to help her make a dress!"</p> <p>"One day, the thing they had always hoped for happened. A ship appeared on the horizon. Quickly, they lit a huge fire to make lots of smoke and raced up the hill to blast the cannon  they had hauled up there."</p> <p>"The crew on the ship heard the cannon blast and looked around with their telescopes to see from where the noise had come. They spotted the smoke from the fire, and turned their ship toward the island. The Robinson family stood together, watching the ship coming closer and closer. Their hearts were filled with all kinds of different feelings."</p> <p>"At last they could return to normal life," explained Jesse's father. "They would be able to see relatives and friends again, but their hearts were feeling sad about leaving the island. They had come to love it, and they really enjoyed life there. As they all stood and watched the ship come closer, each person had to make a decision."</p> <p>"That must have been so difficult for them," said Jesse slowly. "I would have wanted to stay on the island."</p> <p>"The Captain and his crew had thought they would find wild, dirty, starving survivors dressed in rags, and they put together bags of food to give to them. However, the Captain and his men were so surprised when they saw how healthy the survivors were. Then they were amazed at all that the family had done on the island. They loved the beautiful farm and were astonished at all the things the Robinsons had learned how to make. Instead</p>	<p>Students are asked to identify advanced literary concepts such as symbolism, personification, etc.</p> <p>1. The author writes, "The bullets sounded like rustling silk, or like humming-birds on a warm summer's day, or like the wind as it is imitated on the stage of a theatre". Which of the following literary devices is this example of?</p> <p>A symbolism B onomatopoeia C simile D personification</p> <p>2. Describing bullets, the author writes they, "I made one the blind man in a game of blind-man's-buff. Which of the following literary devices is this example of?</p> <p>A symbolism B onomatopoeia C simile D metaphor</p> <p>Students answering questions in Level 15 and above must be able to detect the various nuances of the author's writing as well as discern the correct meaning of a word from a list of very similar definitions.</p>	<p>The stories presented in the final three levels of the Yes Class Writing Program is difficult in nature.</p> <p>Going yesterday to dine with an old acquaintance, I had the misfortune to find his whole family very much dejected. Upon asking him the occasion of it, he told me that his wife had dreamt a very strange dream the night before, which they were afraid portended some misfortune to themselves or to their children. At her coming into the room, I observed a settled melancholy in her countenance, which I should have been troubled for, had I not heard from whence it proceeded. They all appeared as though the world were about to cease existing. We were no sooner sat down, but after having looked upon me a little while, "My dear," says she, turning to her husband, "you may now see the stranger that was in the candle last night."</p> <p>Soon after this, as they began to talk of family affairs, a little boy at the lower end of the table told her that he was to go into join-hand on Thursday. "Thursday!" says she. "No, child, tell your writing master that Friday will be soon enough."</p> <p>I was reflecting with myself on the oddness of her fancy, and wondering that anybody would establish it as a rule, to lose a day in every week. In the midst of my musings, she desired me to reach her a little salt upon the point of my knife, which I did in such a trepidation and hurry of obedience that I let it drop by the way, at which she immediately started, and said it fell towards her. Upon this I looked very blank, and observing the concern of the whole table, began to consider myself, with some confusion, as a person that had brought a disaster upon the family. The lady, however, recovering herself after a little space, said to her husband with a sigh, "My dear, misfortunes never come single."</p> <p>My friend, I found, acted but an under part at his table and, being a man of more good-nature than understanding, thinks himself obliged to fall in with all the passions and humors of his yoke-fellow. "Do not you remember, child," says she, "that the pigeon-house fell the very afternoon that our careless servant spilt the salt upon the table?"—"Yes," says he, "my dear; and the next post brought us an account of the battle of Almanza." The reader may guess at the figure I made, after having done all this mischief.</p> <p>I dispatched my dinner as soon as I could, with my usual taciturnity; when, to my utter confusion, the lady seeing me cutting my knife and fork, and laying them across one another upon my plate, desired me that I would humor her so far as to take them out of that figure and place them side by side. What the absurdity was that I had committed I did not know, but I suppose there was some traditional superstition in it. Therefore, in obedience to the lady of the house, I disposed of my knife and fork in two parallel lines, which is the figure I shall always lay them in for the future, though I do not know any reason for it.</p> <p>A culmination of combined literary knowledge gained from completing the previous levels are essential in answering the more challenging questions now presented.</p> <p>6. The author writes, "What the absurdity was that I had committed I did not know". Which of the following choices is the best definition of absurdity in this context?</p> <p>A ridiculous idea B ridiculous action C harmful idea D harmful action</p>

# Yes Class Writing Curriculum

Overview	G	H	I	J	K	L
	New vocabulary words and definitions are continuously studied. Essay prompts and creative writing is emphasized.	Level H continues to develop students' increasing vocabulary bank, reading analysis ability and better writing skills.	Vocabulary words are explored further. Students are now asked for synonyms, antonyms, etc. Essay writing and reading skills are continuously explored.	Level J continues incremental development of vocabulary, writing skills and reading skills. Parts of speech is introduced.	Parts of speech study is continued. More challenging vocabulary words are studied and new essay prompts are introduced.	Students are asked to work on increasingly challenging and complex essay prompts that require the students to use their cumulative knowledge of vocabulary and essay writing skills.
1	Students are encouraged to draw and use creative writing to answer questions.	A variety of vocabulary learning problems are presented to prevent monotonous repetition and frustration.	Book reports in Level I ask more detailed questions regarding the story and asks students to apply vocabulary words they have learned to the book report.	Students learn to identify correct parts of speech in sentences.	Increasingly challenging vocabulary words are studied in Level K. These problems are presented in different formats to aid in long term memorization of difficult concepts.	Essay prompts asks students to use descriptive writing, story writing, poem writing, etc.

# Yes Class Writing Curriculum

	M	N & O	P	Q	R & S			
Overview	Students learn and interact challenging vocabulary words. More emphasis is placed on picture less essay prompts.	Vocabulary is explored in new methods starting with Level N. Essay sample texts become more challenging to interpret.	Students continue to learn new and challenging vocabulary words. Essay prompts asks students to write increasingly elaborate and complex essays.	High level vocabulary words are studied beginning Level Q. Essays ask increasingly subjective questions that require critical thinking, descriptive abilities and a good command of the English Language	The final two levels of the Yes Class Writing Program expects students to use all of the essay writing skills they have learned to write properly formatted essays concerning persuasion, agreement or disagreement, etc. Advanced literary concepts such as foreshadowing, personification, etc., are explored.			
1	Synonym, antonym, fill in the blank, and picking correct word problems are used to help develop vocabulary skills.	Vocabulary is continued to be explored in different methods.	Students are asked to write paragraphs based on different vocabulary words they have learned.	Parts of speech study continues. Essay prompts requires the student to think subjectively, critically and persuasively. Students are expected to write longer essays exceeding a page.	Vocabulary, parts of speech and book reports are continued to be explored in Levels R and S.			
2								
3								
4								
5	Pick the word that fits this definition: to work hard or toil A. labor B. personal C. motor D. human	Write the vocabulary word that matches each definition. 1) _____ a bird used as food 2) _____ amount of money earned above what was spent 3) _____ capable of happening or existing 4) _____ with no possibility of doubt	Word Bank bright pessimist handkerchief heavily graduate heavy gaseous grocery					
6	Pick the antonym for uglier A. scurry B. prettier C. motor D. unfolding							
7	Pick the synonym for run A. scurry B. human C. motor D. prettier							
8	Fill in the blank: The engine of the car is its _____. A. reason B. human C. scurry D. motor							
9	Essays prompts are focused around blocks of text. Prompts may include questions regarding analysis of text or a creatively written description of an event, or object.							
10	I made a good <u>profit</u> on my investment. A. noun B. adjective C. verb D. preposition	Parts of speech study continues. More challenging concepts such as interjections, slang, prepositions and articles are explored.	Creative essay prompts ask for more elaborate essays and the student receives more space to write stories, descriptions, etc.	That Harris made her so mad! He told her to leave science fiction to boys; she should write stories about lost kittens, pink princesses, and wild horses. Miranda knew some girls who liked that romantic stuff, but it made her want to throw up. Still, Harris was right about getting exercise, so she reluctantly put aside her writing and rode her bike to the library. She checked out an odd number of books by Ursula K. Le Guin – “a female sci-fi writer, thank you!” she said aloud to Harris, though Harris wasn’t anywhere around.  Miranda looked at her list of authors and now planned to read more books by female sci-fi writers. Plus, she figured that an odd number would be a good idea because odd was sort of weird, and she felt a weird story brewing inside of her.  Explain why you think sci-fi section is mainly male dominated.	Sample Prompt: A few decades ago, many families had half a dozen or more children. Nowadays, more and more families are choosing to have only one or two children. Are smaller families better than larger ones? Why or why not? State your position and support it with specific reasons and examples.			
11	I can foresee events and <u>predict</u> the future. A. noun B. adjective C. verb D. conjunction							
12	It is not <u>possible</u> to walk through walls. A. adjective B. noun C. interjection D. verb

14	The Second Little Pig  The second little pig decided to build his house out of sticks. Just as he finished the roof, his little brother blew in. The little pig trembled as he told his brother about the wolf.  “Don’t worry, little brother,” said the second little pig. “Sticks are stronger than straw. Let’s go inside for some peppermint tea.”  The pigs were deep in conversation when they heard an angry knock on the door.  Predict what you think is going to happen next.							
15	Book reports are continued.	Essay texts are more challenging to interpret.  Chameleons are lizards that can change color to hide. When the air gets warmer or colder, their skin changes color. They even change color to show how they feel. Chameleons catch insects with their long tongues, which can be twice as long as their bodies. Chameleons can point each of their eyes in a different direction at the same time to help them see all around them. When they spot an insect they want to eat, chameleons focus both of their eyes forward to help them aim their tongues.  In your own words, describe a Chameleon.				More subjective concepts such as Point of View and stances are explored in Level P essay prompts.  Three days after leaving Southampton, the Titanic was well into the North Atlantic. This area was known for icebergs, and the ship’s workers were responsible for watching out for these dangerous chunks of floating ice.  That Sunday evening the sea was calm. No white-capped waves crashed against the rugged icebergs, which would have made the ice easier to spot. Also, the night was ominously dark and cloudless. No moon shone over the still, open waters.  Then, at 11:40 PM, the crew and other passengers felt a jarring thud against the side of the ship. The Titanic had struck an iceberg. No one panicked, though, because they believed the Titanic was unsinkable.  One person on board knew differently. Explain why you think the one person thought the Titanic was not unsinkable.	Students are expected to use proper essay formatting and display a good command of the English Language. Essay prompts asks creative and subjective questions such as "how do you think the world is like in 500 years?" or "they say money can buy everything. Agree or disagree."	Prompt: Foreshadowing is when the author gives hints to the reader about what is going to take place later in the work. Using a piece of literature that you are familiar with, explain how the author uses foreshadowing and how the use of foreshadowing added to the plot.  Reading comprehension essays requires students to analyze complex pieces of text and provide a good literary analysis of the topic at hand.  By this time, radios had become standard equipment in automobiles as well. Teenagers lucky enough to get permission to borrow the family car, or to have a car of their own, drove to diners, drive-in movie theaters, beaches, and other places. These places became known as teenage hangouts. They played rock ‘n’ roll songs on their radios for everyone to hear.  The radio was also an inexpensive way to market records. As more teenagers heard songs on the radio, the more they liked them. They would go out to record stores and buy records they heard on the radio. As a result, record companies started paying radio stations to play the records that they most wanted to sell. Alan Freed, who dubbed the name rock ‘n’ roll, was a disc jockey at one of these radio stations.  Explain how radios spread interest in rock ‘n’ roll music.
